

## ACTB Solution

```
<script type="text/javascript">
108 function calcamnt()
109 {
110
111 var ctype =document.getElementById("connectiontype");
112 var opt=ctype.options[ctype.selectedIndex].value;
113 if (opt=="Pre")
114 var monthlyrental=parseInt(75);
115 else if(opt=="Post")
116 var monthlyrental=parseInt(150);
117
118
119 if(document.getElementById("scheme1").checked)
120 var cpm=parseInt(200);
121 else if(document.getElementById("scheme2").checked)
122 cpm=parseInt(350);
123 else if(document.getElementById("scheme3").checked)
124 cpm=parseInt(500);
125
126 var dur=parseInt(document.getElementById("duration").value);
127 var total_dur=(dur*cpm) + monthlyrental;
128 document.getElementById("result").innerHTML="The Total Monthly Rental Cost is Rs. "+ total_dur;
129 }
130 function clr()
131 {
132 document.getElementById("result").innerHTML=" ";
133 }
134
135 </script>
```
